

AQ-2000

Features

Aqua Phase Model AQ-2000 is the next step up from the AQ-1000. Designed for the rugged use requirements found in medium size to large size long term care facilities, home medical and durable medical equipment dealers. With the AQ-2000, your operator can select from a 3, 5, or 7 minute wash cycle length thus allowing the most efficient use of time. AQ-2000 includes a wheel rotation system for wheelchairs, so little or no pre-treating of tires is required.

Wash chamber construction of the AQ-2000 is single wall polished Stainless Steel. To enhance the longevity of the AQ-2000, the water/spray distribution system is made of 25mm Stainless Steel and includes solid brass spray nozzles.

Like all Aqua Phase models, in order to operate the machines once the unit is located, all you need to do is hook up two hoses, one for the hot water fill and one for the drain, plug the Aqua Phase in and begin saving time, improving efficiency and enhancing infection control.

Standard Features - AQ-2000:
