

AQ-Sprite

Features

The AQ-Sprite is an efficient, basic medical equipment washer that gets the job done. Like all Aqua Phase models, the AQ-Sprite will save your staff a tremendous amount of time and hand-off one of the most disliked tasks in at your facility to a machine.

The AQ-Sprite benefits from the years of "cleaning know-how" and experience at Aqua Phase. We've purposely kept it simple. By limiting the features and options available, we can offer you the best pricing available on a basic medical equipment washer.

The AQ-Sprite is the only Aqua Phase model that can reasonably be compared to most other manufacturers - based on its construction, components, performance, and price, the AQ-Sprite comes out ahead. All other Aqua Phase models available (AQ-1000, AQ-2000, AQ-3000 and AQ-4000) include standard features that exceed virtually everything else.

Like all Aqua Phase models, in order to operate all you need to do is hook up two hoses, one for the hot water fill and one for the drain, plug in the AQ-Sprite and begin saving time and improving efficiency. If your needs go beyond basic equipment washing, such as automatic application of disinfectant solution or rotation of wheelchair wheels while cleaning, we recommend that you review our full line of Aqua Phase models, beginning with the AQ-1000.
